

Getting Started with JMP®: Where to Go for Help

Resources within JMP

Tip of the Day

Forty-three tips and tricks to help you get started; the Tip of the Day window provides tips about using JMP that you might not know. Some tips are basic introductory information, and others share hidden power features that you should learn after getting comfortable with the basics.

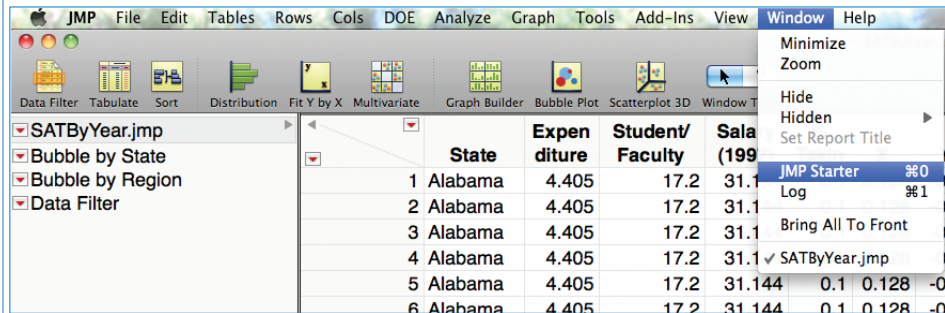

Found in the Help menu.

JMP Starter

The JMP Starter gives alternative access to most commands found on the main menu or on toolbars.

Found in the Window menu (Macintosh) or in the View menu (Windows).

Help Tool

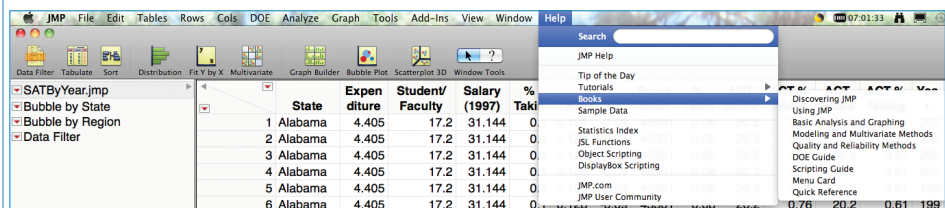

The Help Tool, which looks like a question mark, opens context-sensitive Help when you click the tool and select any part of a display or report.

Reference Books

In addition to a menu card and quick reference guide, the following books are available in PDF format from the Help menu:

- *Discovering JMP*
- *Using JMP*
- *Basic Analysis and Graphing*
- *Modeling and Multivariate Methods*
- *Quality and Reliability Methods*
- *DOE Guide*
- *Scripting Guide*

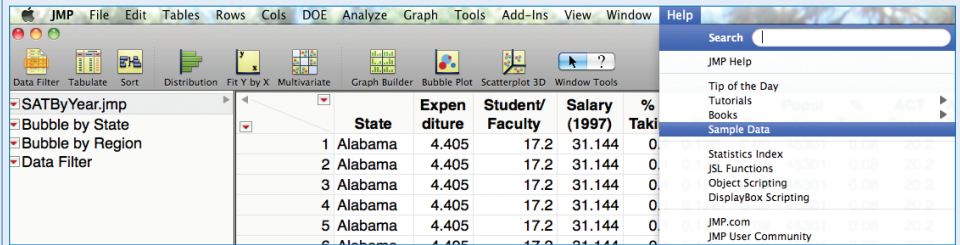

Resources within JMP (continued)

Sample Data Directory

Accessed from the Help menu, the Sample Data Directory contains more than 300 data files, grouped both by topical context and analysis technique. Open the subject headings to see a list of data tables you can use to explore a given topic. Click the blue underlined file name to open a data table. Then, within each data table, study the table notes and column notes for more information.

Found in the Help menu.
